ServisLokal — Dokumentasi Lengkap

Marketplace Jasa Lokal Nasional — 38 Provinsi, Aceh hingga Papua

EMOSTFET 11 — Web Design Competition Tema: *Designing Impactful Digital Solutions for Everyday Life* Tim: ServisLokal |
Tanggal: 30 Agustus 2025 | Versi: 2.0 Titik Terang

Daftar Isi

1. Cover & Identitas
2. Latar Belakang (Guidebook + Riset Lapangan)
3. Deskripsi & Tujuan Lomba (Mapping ke Solusi)
4. Tema & Relevansi
5. Target Pengguna & Persona Nasional
6. PRD Lengkap — Fitur per Role
7. User Flow End-to-End
8. Arsitektur Sistem & Model Data
9. Konsep UI/UX — Kenapa Begini (Titik Terang)
10. Design System — Tokens, Tipografi, Motion
11. Halaman per Halaman (Landing → Dashboard)
12. Inovasi & Keputusan Teknis
13. Sistem Penilaian → Jawaban Kami (20/30/25/15/10)
14. Teknologi
15. Pengujian & Kualitas
16. Dampak, Skalabilitas Nasional & Roadmap
17. Timeline & Output Lomba
18. Lampiran

1. Cover

- **Nama:** ServisLokal — *Jasa terbaik dari orang terpercaya di sekitarmu*
- **Tagline:** Jangkauan nasional • 38 provinsi • Aceh hingga Papua
- **Visual:** Hero oranye di hitam pekat, 38 provinsi pill (Pangkal Pinang, Tanjung Pinang, Jayapura, Denpasar, Banda Aceh), orb 3D 1400 partikel
- **Akses:** <https://servislokal.id> (Vercel sin1 Singapore), admin@servislokal.id / password123

2. Latar Belakang

Guidebook: Perkembangan digital pesat, website jadi sarana bisnis & pelayanan, tapi pelajar belum punya wadah. EMOSTFET hadir sebagai wadah ide kreatif inovatif, interaktif, bermanfaat.

Masalah Riil yang Kami Temukan (15 wawancara, 10 provider, 5 customer di 7 kota): - Cari tukang AC, bersih rumah, listrik, pindahan masih via **Status WA, grup Telegram, spanduk** — tidak ada katalog, harga, rating. - Banding harga mustahil: tanya satu per satu via chat. - Takut ditipu: tidak ada rating asli, foto hasil, atau jaminan batal. - Provider luar Jawa (Bangka Belitung, Papua, NTT) sepi order: tidak ditemukan di pencarian "tukang terdekat" yang hanya index Jawa. - Dampak: 70% jasa lokal sepi 3-5 order/bulan padahal permintaan ada.

Bukti di Code: `app/services/page.client.tsx` butuh filter kota yang work, `lib/location.ts` parsing alamat Indonesia `Jl. X No.1, Kelurahan, Bandung` → `bandung lowercase`, bukan `Jl` yang cocok semua.

3. Deskripsi & Tujuan Lomba

Deskripsi Guidebook: Kompetisi desain digital pelajar/mahasiswa untuk solusi inovatif berbasis website yang nyaman (UI/UX), mulai identifikasi masalah hingga prototype klikable.

Tujuan Guidebook (5) → Tujuan ServisLokal: 1. Wadah kreativitas → **Wadah transaksi nyata**, bukan showcase. 2. Solusi inovatif bermanfaat → **Marketplace yang bisa dipesan beneran** (Katalog → Checkout → Kanban → Selesai → Ulasan). 3. Kemampuan rancang nyaman → **UX 30%** kami kejar (flow 1 klik, sticky order box, kanban grip). 4. Minat teknologi → **Next.js 15 + R3F** yang dipelajari tim. 5. Kreativitas, problem solving, presentasi → **Presentasi 90 detik demo Bangka Belitung**.

4. Tema & Relevansi

Tema: *Designing Impactful Digital Solutions for Everyday Life*

Relevansi ServisLokal: Cari tukang adalah *everyday life* — AC bocor, kos kotor, listrik konslet, pindahan. Solusi digital berdampak: dari mulut ke mulut menjadi **marketplace transparan** (harga `formatIDR`, rating `RatingStars`, foto `ServiceTile` 44 aktif). Dampak terukur: provider Hendri Bangka kini bisa ditemukan dari Jakarta via `?location=Kepulauan Bangka Belitung` (contains lower).

5. Target Pengguna & Persona Nasional

Guidebook: Pelajar & Mahasiswa (tim max 3) — tapi **target pengguna produk** adalah masyarakat umum.

Persona (untuk PDF, pakai foto pravatar):

Persona	Usia	Kota	Pain	Gain
Citra, Ibu RT	28	Pangkal Pinang, Kepulauan Bangka Belitung	Butuh bersih rumah mingguan, takut provider tidak datang, tidak tahu harga pasar Bangka	Cari di HP, filter "Bangka", lihat rating 4.8, pesan, alamat lengkap, chat jadwal
Hendri, Provider	35	Pangkal Pinang	Sepi order, hanya spanduk, tidak punya katalog	Buka jasa <code>hendri.bangka@email.com</code> , upload foto device auto 1280px, terima di kanban drag
Sari, Mahasiswa	22	Bandung	Kos AC tidak dingin, banding harga susah, takut ditipu	Banding 3 jasa AC, lihat ulasan asli, pesan, bayar simulasi, beri 5 bintang
Admin	—	Nasional	Butuh moderasi DRAFT & lihat kesehatan platform	Dashboard 5 KPI + grafik 14 hari + top 5 provider

Cakupan Nasional 38 Provinsi: `lib/provinces.ts` 38 (Aceh, Bali, Banten, Bengkulu, DI Yogyakarta, DKI Jakarta, Gorontalo, Jambi, Jawa Barat, Jawa Tengah, Jawa Timur, Kalimantan Barat, Selatan, Tengah, Timur, Utara, Kepulauan Bangka Belitung, Kepulauan Riau, Lampung, Maluku, Maluku Utara, NTB, NTT, Papua, Papua Barat, Barat Daya, Pegunungan, Selatan, Tengah,

Riau, Sulawesi Barat, Selatan, Tengah, Tenggara, Utara, Sumatera Barat, Selatan, Utara). Seed 23 provider dari Banda Aceh hingga Jayapura.

6. PRD Lengkap

6.1 Ringkasan Produk

Marketplace jasa lokal: pelanggan pesan, provider kerjakan, admin moderasi. 3 role, 6 kategori, 46 jasa (44 aktif), 146 order selesai, rating 4.48/5.

6.2 Fitur per Role

Untuk Pelanggan (Customer): - Katalog `app/services/page.client.tsx`: filter kategori, rentang harga Rp + chip <100rb | 100-300rb | 300rb+, rating ≥ 4.5 / 4 / 3, kota/provinsi `datalist` 40 (Kepulauan Bangka Belitung), search multi-kata `contains` judul/deskripsi/nama provider, sort `newest/price/rating`, paginasi 12, `keepPreviousData` + `aria-live count`. - Detail service/`[slug]/page.tsx` (Server, `force-dynamic`): harga, estimasi, provider `formatCity` Title Case, ulasan asli (distribusi bintang), jasa serupa `take 3` rating desc, JSON-LD Service + `AggregateRating`, `noindex` jika `ARCHIVED`. - Checkout `checkout/page.tsx`: alamat wajib min 5 char (nasional placeholder Pangkal Pinang, Kepulauan Bangka Belitung + chip), deadline `refine` masa depan + chips `Besok/2 hari/Minggu`, metode `RadioCardGroup` (transfer/ewallet/cod) + `PAYMENT_DETAILS`, ringkasan GRATIS biaya layanan, trust Bisa batal gratis + konfeti `canvas-confetti`. - Dashboard `dashboard/customer/page.tsx`: KPI 4 (Total, Berjalan, Selesai, Belanja `!==CANCELLED`), riwayat filter `all/active/completed`, `SavedServices` wishlist toggle atomik. - Ulasan `components/orders/review-form.tsx`: radiogroup 5 bintang `role=radio` + `ArrowLeft/Right`, hanya `COMPLETED` dalam `REVIEW_WINDOW_DAYS 60`, `recompute` `computeRatingAggregate` transaksi. - Pesan `MessageThread` (`max-h-[50vh]` desktop, polling 8s `refetchIntervalInBackground:false`).

Untuk Penyedia (Provider): - Kanban `dashboard/provider/page.tsx` + `order-kanban.tsx`: 3 kolom `PENDING` (warning) → `IN_PROGRESS` (info) → `COMPLETED` (success) dot bg-warning/info/success, grip `GripVertical` drag `PointerSensor` distance 6 + `TouchSensor` delay 250, tombol kontekstual Terima & Kerjakan / Tandai Selesai, validasi `canTransition` + toast Tidak diizinkan: "Menunggu → Selesai", invalid drop border-destructive/40, vibrate 10 + confetti, undo hanya jika `canTransition(next, prev)`. - Kelola jasa `dashboard/provider/buka-jasa/page.tsx` + `buka-jasa-form.tsx`: form title min 3, price >0, `deliveryTimeDays` 1-90, description min 20 max 500, **gambar cover dual-mode**: Ambil dari Device (drag & drop, accept `image/*` max 10MB, canvas max 1280 `toDataURL` jpeg 0.82 auto sesuaikan rasio, preview h-24 + badge Auto-sesuaikan) **atau** URL `https://` (validasi `refine` terima `data:image/`), preview kartu langsung bg-accent, toggle status `ACTIVE/DRAFT/ARCHIVED` via `PATCH /api/services/[id]`. - Ringkasan pendapatan revenue dari `COMPLETED` + `todayOrders` WIB Asia/Jakarta `T00:00:00+07:00`. - Tabel riwayat Order terbaru 6, kartu mobile.

Untuk Admin: - Ringkasan `dashboard/admin/page.tsx`: 5 KPI (Counter Rp), `OrdersAreaChart` 14 hari + `CategoryRevenueChart` (`dynamic` `ssr:false`), moderasi `DRAFT` (preview 4 + Buka moderasi), Pesanan Terbaru 8 baris tabel hover:bg-accent, Top 5 Provider. - Moderasi `dashboard/admin/moderasi/page.tsx`: `PATCH` status `ACTIVE` `onMutate` `busyId` + toast + `invalidate`. - Kelola pengguna `dashboard/admin/users/page.tsx`: `adminRead` 60/m, search client, `POST impersonate` (rate 10/jam) + `POST unimpersonate` (dual cookie `__Secure-`). - Ekspor CSV `app/api/admin/export/route.ts`: `escapeCsv` anti `+=@t\r` + BOM, `adminExport` 5/5m, filename `orders-YYYY-MM-DD.csv`.

6.3 Alur Pembayaran & Status

`Order.status` FSM `lib/order-status.ts:17` `PENDING` → `IN_PROGRESS` → `COMPLETED` (terminal) + `CANCELLED` dari `PENDING/IN_PROGRESS` (customer hanya `CANCELLED`). `completedAt` hanya saat `COMPLETED` (jendela ulasan tidak reset). Guard di `PATCH /api/orders/[id]` 409 + UI sembunyikan tombol ilegal.

7. User Flow End-to-End (Diagram Teks)

```
[ Landing hero 38 provinsi pills Pangkal Pinang ]
  ↓ klik pill ?location=Kepulauan Bangka Belitung
[ Catalog /services?location=Bangka (filter city contains lower) ]
  ↓ klik ServiceTile "Bersih Rumah Bangka" (Jasa Packing Saja)
[ Detail /service/[slug]?tab=reviews – galeri aspect-[4/3] swipe, Tabs deep-link, formatCity ]
  ↓ Pesan Sekarang
```

```
[ Checkout ?service=slug - alamat wajib (chip Bangka) + deadline Besok → Konfirmasi → confetti + wa.me share ]
↓ POST /api/orders (address required, deadline future, self-order 400)
[ Orders/[id] - OrderTimeline + estimasi createdAt+deliveryTimeDays + chat + cancel dialog ]
↓ Provider: Dashboard Kanban drag Terima → IN_PROGRESS
[ Notification bell 30s (updatedAt) → Provider Tandai Selesai → COMPLETED ]
↓ Customer: ReviewForm 5 bintang Arrow keys → POST /api/reviews transaksi
[ Service ratingAvg 4.48 recompute, Dashboard Total Belanja update ]
```

8. Arsitektur Sistem & Model Data

Struktur:

```
app/(auth)/login,register | app/api/* (20 handler) | app/services | service/[slug] | checkout | orders/[id] | dashboard/
components/{ui (button card badge dialog tabs input skeleton...), services, orders, provider, dashboard, landing, layout,
lib/{auth, prisma, order-status, rate-limit, api-guard, location, provinces, site-url, motion, rating, utils}
prisma/{schema.prisma, migrations (7), seed.js (46 jasa), backfill-city.js}
tests/ (7 files 108 tests) | e2e/ (order-lifecycle + public-pages)
```

Model (prisma/schema.prisma:10): User {id, name, email @unique, passwordHash, role CUSTOMER/PROVIDER/ADMIN, location, city @index([role,city]), avatarUrl, bio, createdAt, updatedAt} Category {id, name @unique, slug @unique, icon, description} Service {id, providerId → User, categoryId, title, slug @unique, description, price, deliveryTimeDays, imageUrl, images, ratingAvg, totalReviews, status ACTIVE/DRAFT/ARCHIVED @index([categoryId,status])} SavedService {@@unique([userId,serviceId])} Order {id, customerId, serviceId, totalPrice, status PENDING/IN_PROGRESS/COMPLETED/CANCELLED, paymentMethod, orderNotes, address (wajib String), deadline, createdAt, updatedAt @updatedAt, completedAt @index([customerId,status])} Message {orderId, senderId, content, createdAt @index([orderId,createdAt])} Review {orderId, reviewerId, rating 1-5, comment}

Kenapa city terpisah: Filter location contains di location cocok Jl → seluruh katalog. city lowercased, indexed, tidak butuh mode:insensitive (tidak ada di SQLite, case-sensitive di PG).

9. Konsep UI/UX — Kenapa Begini

Visi PLANNING.md Titik Terang: Oranye menyala di hitam pekat = hangat tetangga + tegas transaksi. Krem #FBFAF8 bukan putih klinis. Dua mode penuh, bukan dark asal.

Referensi Nyata: Fiverr (katalog harga hero, sticky order box), Thumbtack/Urban Company (marketplace lokal), Linear (expo easing, kanban tenang), Vercel/Framer (grid noise + glow disiplin), Stripe (shadow berlapis), Raycast (kbd /), Gojek (KPI uang hero). **Anti-slop:** tanpa gradien ungu, tanpa emoji, tanpa rounded-2xl tanpa shadow.

Kenapa Hero orang terpercaya bukan tetangga: Awal "tetangga" terasa hyper-lokal RT, "orang" lebih nasional & inklusif 38 provinsi, tetap hangat.

Kenapa Dashboard per Role (bukan tab campur): PLANNING-UIUX — Stripe (KPI), PostHog (area), Vercel (sidebar 240px), Fiverr (gig), Gojek (driver angka besar). Satu tindakan berikutnya jelas.

Kenapa Upload Device + URL: Provider Bangka sering foto via HP, tidak punya URL. Auto-kompresi canvas 1280px jaga DB & LCP, rasio terjaga, unoptimized untuk data: .

10. Design System

Warna Light: background 40 33% 98%, primary 25 95% 53% #F97316, primary-strong 22 90% 38% 5.0:1, destructive 0 72% 51%, success 158 74% 27%/soft 94%, border 35 20% 88%, input 35 20% 50% 3.47:1, ring 25 95% 46%. **Dark:** background 20 14% 4%, card 24 10% 7%, primary 28 96% 58%.

Tipografi: Plus Jakarta Sans + Instrument_Serif via next/font, clamp text-6xl 2.5rem→4.5rem, text-3xl fluid.

Radius/Shadow: xl 24px card, shadow 0 8px 24px rgba(12,10,9,.06) light / 0 12px 32px rgba(0,0,0,.5) dark, glow 0 8px 32px rgba(251,122,35,.25) .

Motion: DURATION fast 150 / base 250 / reveal 800, GSAP_EASE smooth power3.out, prefers-reduced-motion kill-switch (globals.css:139), hero orb useFrame skip jika reduce, reveal Counter .

Aksesibilitas: 1 h1/halaman, CardTitle as h2, focus-ring, RadioCardGroup roving tabindex Arrow, aria-live, skip-link, scrollbar tipis, kontras AA (test 47).

11. Halaman per Halaman

- **Landing app/page.tsx (force-dynamic):** Hero ShieldCheck pill 38 provinsi Aceh→Papua + headline orang terpercaya + subcopy + search besar + pills kategori (2 featured lg:p-6 + blur) + 6 jasa terbaru ServiceTile + cara kerja 4 langkah (Search/Users/CreditCard/Truck) + statistik 4 (providerCount 22, completed 146, rating 4.48, city 21 + Counter) + CTA Punya keahlian? bg-background text-primary-strong .
- **Catalog:** PageShell wide, h1 Jelajahi Jasa di atas grid (a11y), sort custom listBox (kini bisa ganti ke Radix), filter sidebar sticky top-24 + drawer 85vh + grabber h-1 w-10, chip Rp + preset, empty Reset .
- **Detail:** generateMetadata + JSON-LD Service, galeri aspect-video (mobile aspect-[4/3]), thumb border-primary shadow-glow, lightbox Dialog max-w-4xl, Tabs description/reviews/about deep-link ?tab=, distribusi bg-rating, ReviewSubmitted hijau, related 3.
- **Checkout:** Stepper 2 langkah Detail Jasa → Alamat & Bayar aria-current=step, form address rows 3 nasional + chip Bangka, deadline min=besok + chips, RadioCardGroup + PAYMENT_DETAILS, ringkasan GRATIS + trust, mobile fixed bottom total.
- **Orders:** OrderTimeline + COMPLETED confetti 80 + estimasi createdAt+delivery, Informasi (Metode, Tanggal, Alamat, Deadline, Estimasi, Catatan), cancel dialog AlertTriangle, provider Terima / Selesai, MessageThread 50vh + quick chips Halo kapan bisa? .
- **Dashboard Customer:** KPI 4, Tabs all/active/completed (kini bisa sync URL), EmptyState ke catalog.
- **Provider:** 4 StatCard (Store/Wallet/Inbox/Clock), OrderKanban 3 kolom dot + drag grip, ServiceTile 6, Order Terbaru list OrderStatusBadge, rating & revenue.
- **Admin:** 5 KPI, OrdersAreaChart + CategoryRevenueChart dynamic ssr:false, moderasi DRAFT chip, tabel 8, Top 5 formatIDR .

12. Inovasi & Keputusan Teknis

- **city kolom terpisah indexed** — bukan hitung tiap request (scalable).
- **FSM** TRANSITIONS + transitionError + 409.
- **Token Bucket** lib/rate-limit.ts MAX 10k + sweep periodik, per-user clientKey, header RateLimit-*, 14 rule (register 5/jam ... impersonate 10/jam).
- **Upload device** canvas 1280 jpeg 0.82, fallback URL, unoptimized data:.
- **Seed nasional** 46 jasa 44 aktif, galleryPool per kategori, addressSamples 20 kota, deadline future.
- **Buka Jasa layout** flex lg:flex-row lg:items-start self-start shrink-0 (fix kiri ikut naik).

13. Sistem Penilaian → Jawaban (Mapping)

- **Pemahaman 20%:** Filter city + backfill idempoten + test location.test.ts 12.
- **UX 30%:** Flow 1 klik, sticky, kanban, chat, a11y, skeleton, polling control.
- **UI 25%:** Titik Terang, token, clamp, glow disiplin, zero slop checklist 6/6.
- **Kreativitas 15%:** Orb 3D 1400 sphere + brand lerp, galleryPool, nasional.
- **Presentasi 10%:** Demo 90 detik Bangka + script 5 menit + Counter + konfeti.

14. Teknologi

Next.js 15.1 App Router, React 19, Tailwind 3.4, Prisma 5.20, SQLite dev / PostgreSQL prod (via `scripts/vercel-prepare.js` switch), NextAuth v5 Credentials JWT 30d, TanStack Query 5, Radix, lucide, sonner, recharts (dynamic), GSAP 3.15, R3F 9.7, three 0.185, zod 3.23, bcryptjs 10.

15. Pengujian & Kualitas

- `npm run typecheck` 0, `npm test` 108 (color-contrast 47, order-status 17, rate-limit 13, location 12, rating 6, csv 8, utils 5), `npm run build` 13 route, e2e 16 serial (order-lifecycle + public-pages).
- CI `.github/workflows/ci.yml` verify (migrate+seed+typecheck+unit+build+smoke) + e2e (cache browser).
- Security: `next.config.mjs` headers nosniff/DENY/HSTS, no-store api, CSV anti formula, `middleware.ts` whitelist + role guard.

16. Dampak, Skalabilitas & Roadmap

Dampak: Provider lokal naik 3-5 order/bulan → terukur, pelanggan banding harga 5 menit vs 1 hari.

Skalabilitas: city indexed, migrate 7 + 2 baru, `vercel-build` sin1, polling siap ganti Redis/Pusher.

Roadmap 3 Sprint: Sprint 1 Midtrans + Upstash + AuditLog, Sprint 2 Realtime + lokasi autocomplete, Sprint 3 CI+Sentry+Neon branch.

17. Timeline & Output

Guidebook: Daftar 14-28 Juli → TM 31 Juli → Kumpul Drive 25-30 Aug → Seleksi 1-2 Sep → Final 7 Sep → Juara 8 Sep.

Output: Prototype klikable `http://localhost:3000` + `https://servislokal.id` + Dokumen ini PDF + `vercel.json`.

18. Lampiran

- **Akun Demo (password123):** `admin@servislokal.id`, `budi.santoso@email.com` (Jakarta), `hendri.bangka@email.com` (Bangka), `lina.natuna@email.com` (Kepri), `dewi.lestari@email.com` (customer).
- **Env:** `DATABASE_URL=file:./dev.db` | `postgres://`, `AUTH_SECRET=openssl rand -base64 32`, `AUTH_TRUST_HOST=true`, `NEXT_PUBLIC_SITE_URL=https://servislokal.id`.
- **Perintah:** `npm ci && npx prisma generate && npm run db:migrate && npm run db:seed && npm run dev`.

Zero AI Slop — Setiap piksel punya alasan. Dibuat untuk 38 provinsi, dari Aceh hingga Papua.
